

MITTENS - use 1/4" seam allowances

- Using the measurements in diagram L and the enclosed mitten templates, cut your pieces from desired fleece fabrics.

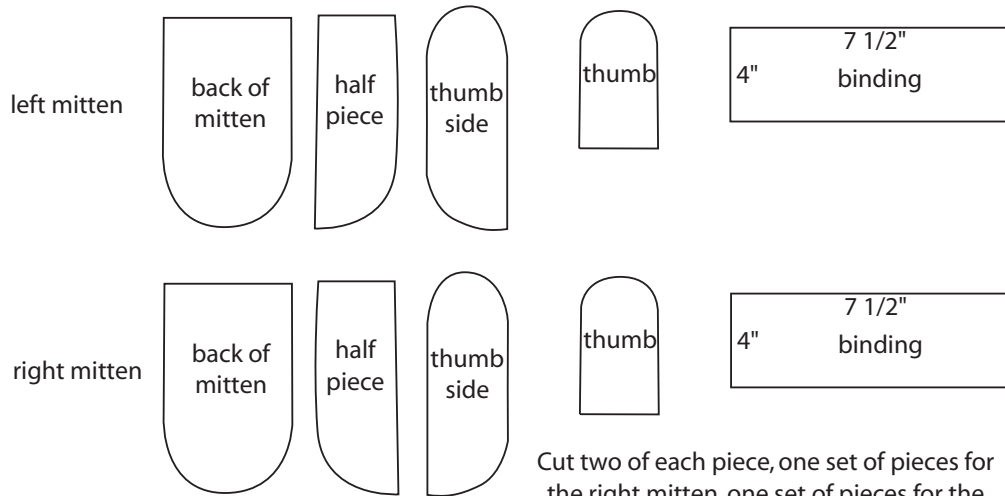

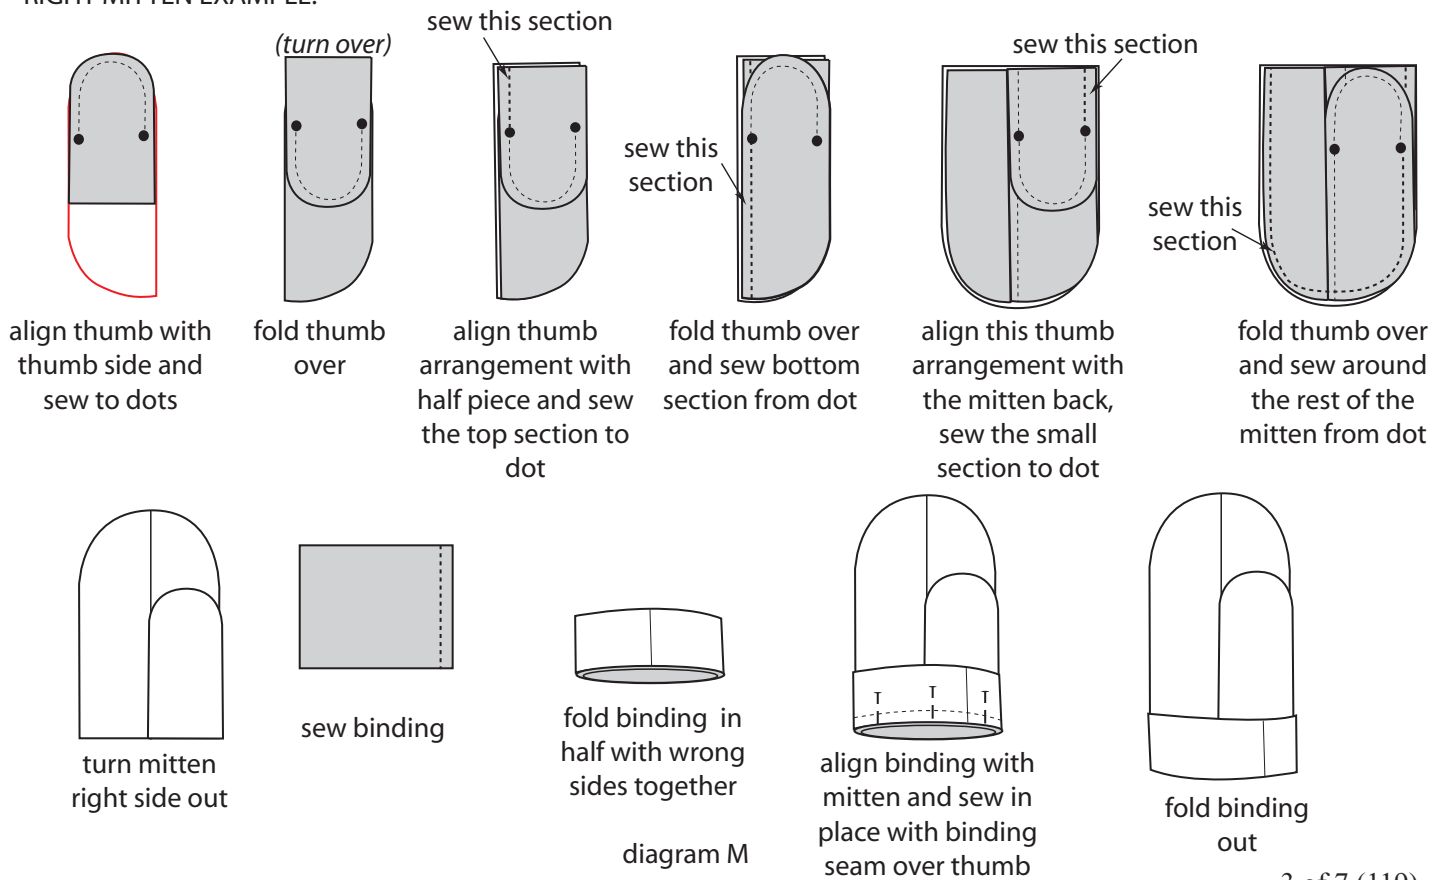

diagram L

Cut two of each piece, one set of pieces for the right mitten, one set of pieces for the left mitten. [Flip the pattern pieces when cutting out the right and left mittens if the fleece appears to have a right and wrong side.]

- Diagram M describes the basic mitten construction. Be sure and make a RIGHT and LEFT mitten. The GREEN FROG MITTENS are basic construction. The other four mittens (cat, bear, bumblebee, and ladybug) have embellishments that are described in steps 2 - 5 that you should read before proceeding.
